Education

2016

Sakarya University

MS/Computer and Informatics Engineering

2014

Istanbul University

BS/Mathematics

Key Attiributes

Project Coordination

Process Improvement / Automation
Focus

Collaboration & Teamwork

Critical Thinking

High Availability / Resilience Focus

Languages

English (Good proficiency in spoken
and written)

Turkish (Native)

Summary

A highly experienced Mainframe System Engineer with 12 years in IT, including 10 years of specialized experience in critical Mainframe systems. Proven expertise in the management of critical IBM Middleware products, specifically IBM CICS Transaction Server, IBM MQ, and CICS Transaction Gateway (CTG). Highly skilled in the full lifecycle management of these products, including installation, customization, problem analysis, performance monitoring, and reporting. Successful track record of involvement in large-scale Mainframe projects such as system Upgrades, Migrations, and critical Re-platforming initiatives.

Technical Skills

IBM Middleware

- CICS Transaction Server
- IBM MQ
- CICS Transaction Gateway
- IBM TXSeries
- WebSphere Application Server
- Tibco Substation

Operating Systems

- z/OS (3.1, 2.5, 2.4 Parallel Sysplex)
- UNIX
- z/VM (SUSE Linux)

Monitoring & Tools

- Omegamon, BMC Mainview (CICS/MQ)
- MQ Explorer, CICS Explorer
- CICS PA, CICS IA
- DFHSTUP/DFH0STAT

Automation & Scripting

- REXX
- JCL (Job Control Language)

Work Experience

AKBANK T.A.S.

August 2022 - Currently

Senior Mainframe System Engineer (Hybrid)

- Responsible for the installation, customization, problem analysis, reporting, and monitoring of critical IBM Middleware products, including CICS, MQ, CTG, and Tibco Substation.
- Performing similar responsibilities to previous roles, focusing on ensuring high availability, performance optimization, and problem resolution for core banking systems.

EUROPEAN PATENT OFFICE

January 2021 - August 2022

Middleware Administrator (Remote)

- Responsible for the installation, customization, and comprehensive system-level support for IBM TX Series (CICS) 9.1, CICS Transaction Gateway 9.1, and IBM MQ 9.2.
- Actively involved in the Mainframe Replatforming project, focusing on the seamless integration of the entire mainframe structure into open systems environments.
- Managed CICS, CTG, and MQ systems in a UNIX environment following the replatforming process.

HALKBANK

Mainframe System Specialist (On-site)

May 2016 - January 2021

- Delivered system programming support for CICS/TS 5.5 and IBM MQ 9.2 within a z/OS 2.4 Parallel Sysplex environment, comprising 100+ CICS regions and 10+ MQ queue managers.
- Implemented CICSplex SM across multiple MVS images for a large DB2 Data Sharing environment.
- Utilized WLM (Workload Manager) to balance CICSplex workloads and improve response time.
- Monitored CICS and IBM MQ performance and throughput using tools like BMC Mainview for CICS/MQ and CICS PA.
- Supported and monitored IBM Websphere Application Server 8.5.5.13 and IBM HTTP Server on z/VM (SUSE Linux).

Distributed Systems Operation Specialist (On-site)

September 2014 - May 2016

- Performed monitoring, performance analysis, and problem follow-up for Microsoft server systems and VMware virtual structures.
- Managed 7x24 operations and job scheduler products.

Driven by a "No-Touch Production" and "Everything-as-Code" philosophy, I am committed to enhancing system reliability, reducing costs, and ensuring scalable IBM Mainframe solutions that meet complex organizational demands.
